

A From input to selected genes

SCMarker | 384 cells | 4 sample groups

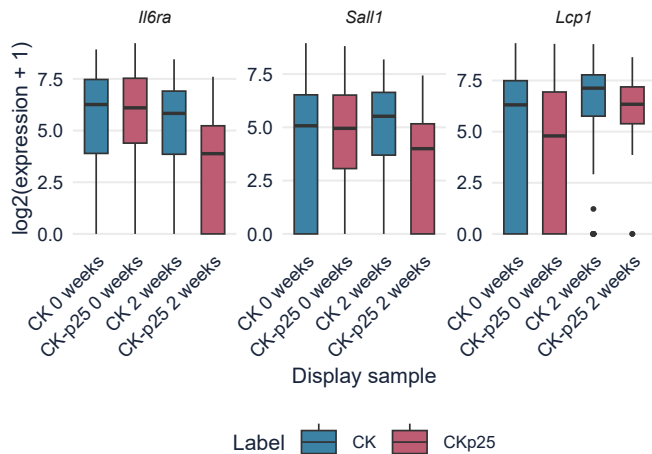

B Expression context of the top 20

Means by sample after gene-wise standardization

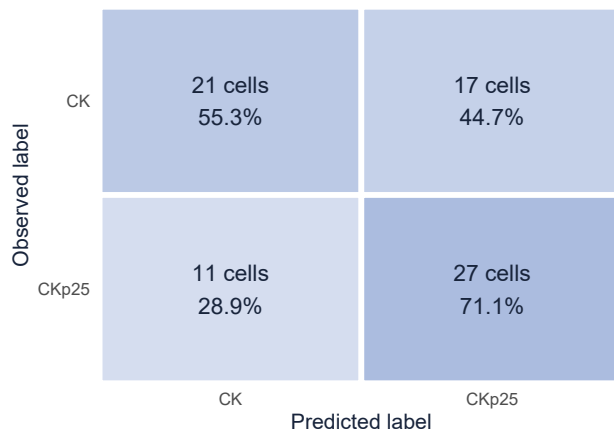

C Inspect individual expression patterns

Cell distributions | 96 cells per sample group

D Within-dataset classification

Top 20 genes | k-NN | accuracy 63.2%

76 held-out cells; percentages within observed class
Cell-level split; independent samples were not held out
